

INTRODUCING THE

# Celestron Wedge

FOR NEXSTAR EVOLUTION AND SE 6/8

The new Wedge for NexStar Evolution and NexStar SE 6/8 mounts turns our venerable single fork arm telescopes into portable astroimaging powerhouses.

Our popular NexStar SE and our new NexStar Evolution telescopes are great for astrophotography, however an EQ wedge is necessary to take longer exposure images, or to advance further and use an autoguider.

## Say hello to the Celestron Wedge for NexStar Evolution and NexStar SE 6/8!

This Wedge was reengineered from the ground-up, specifically tailored to the NexStar Evolution and SE's size and styling. Weight is minimal to keep the whole setup light and portable, yet the platform is sturdy to support taking long exposure astrophotos.

Unlock the full imaging potential from your NexStar Evolution or SE 6/8 mount with this new Wedge!
