

OmniXLT AZ Finder

| Feature | Benefit |
|-------------------------------|---|
| Larger optical window | Larger field of view means easier aiming |
| New reticle | No longer limited to a "red dot". Production models will have two concentric circles for easier target acquisition. Inner circle is about 3/4 of a degree, outer circle is about 2 degrees. Can be customized for specific accounts if the quantities are large enough. |
| Modernized industrial design | Not the same boring finder used from astronomy to airguns. This is a completely new design! |
| Easy assembly and disassembly | Dovetail connection uses finger screws. Screwdrivers are no longer required |
| Brighter LED | Bright enough to be seen during the day |

Will debut with Omni XLT AZ telescopes, but will be made available separately at a later date
