USB 3.2 GEN 1

M-DISC archival technology

Nero Burn and Archive software

Keep your data safe

Discs are fast becoming the most reliable media to archive your data on. Unfortunately, more and more notebook vendors choose to leave the optical drive out of their notebooks in favour of slim designs.

Verbatim has the solution with the Blu-ray Writer with its super slim, brushed metal enclosure, ideally suited for use with a notebook or ultrabook.

Use it to create a back-up of all the important files that you don't want to lose, family pictures, videos, accounting documents, and more.

The bundled Nero Burn and Archive software, featuring DiscSpan, MediaHome, and SecureDisc Technology, simplifies organization, burning, and archiving.
